

FLOW CONTROL GATES

Wall Mounting Gate

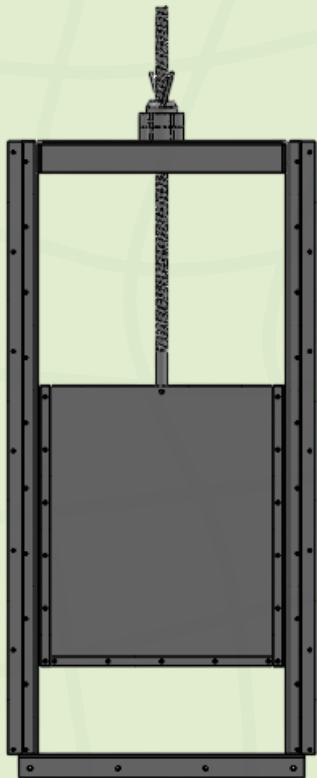

- Mounting- Wall / channel mounted
- Size- As per requirement
- Sealing- Metal-Metal & Metal-Non metal
- Water heads- till door depth (seating/unseating)
- Material of construction- SS304, SS316, Alu
- A sluice gate helps to control water flow and water levels.
- When lifted or lowered the gate, it changes how fast and how much water moves in a channel or pipe.
- This helps stop floods, send water where it is needed, and keep water at safe levels.
- Can be operated manually, electrically, pneumatically, hydraulically as per client demand.
